# Ejercicio 11 Tarea 5 Informe

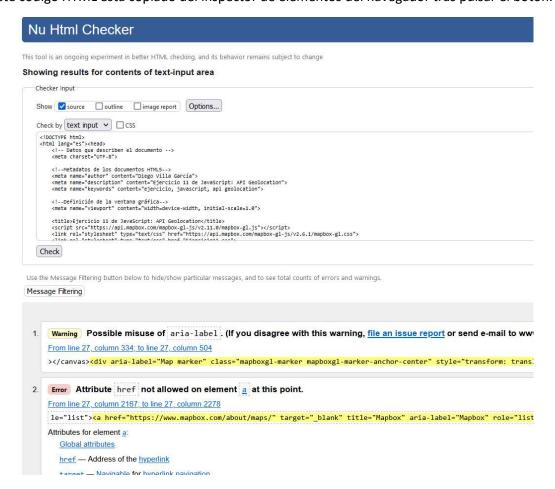

Diego Villa García - UO277188

A continuación, se muestra con capturas de pantalla la comprobación del sitio web con los validadores de la asignatura. El ejercicio se hizo utilizando la API de MapBox.

En el elemento *section* utilizo un id porque el API necesita el id de un elemento para colocar el mapa.

#### **HTML**

Attributes for element a:

Global attributes

href — Address of the hyperlink

target — Navigable for hyperlink navigation

download — Whether to download the resource instead of navigating to it, and its filename if so

ping — URLs to ping

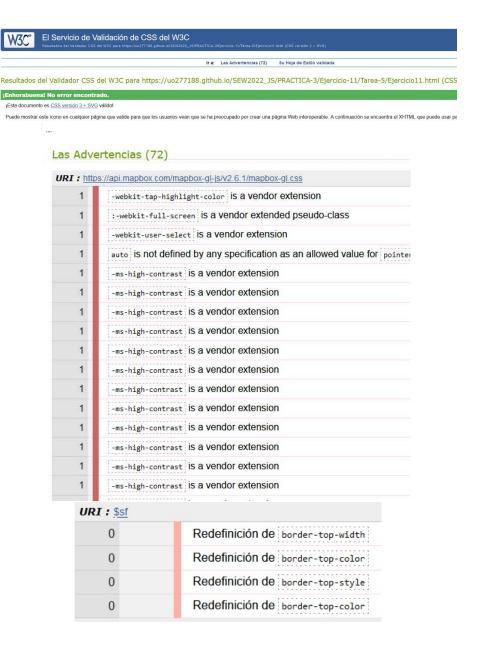

rel — Relationship between the location in the document containing the hyperlink and the destination resour

hreflang — Language of the linked resource

type — Hint for the type of the referenced resource
```

Todos los errores que aparecen pertenecen al código HTML generado por la propia API, así que no tienen solución.

#### **CSS**

Aparecen dos bloques con muchas advertencias que pertenecen a la hoja de estilos de MapBox que tuve que importar.

k rel="stylesheet" type="text/css" href="https://api.mapbox.com/mapbox-gl-js/v2.6.1/mapbox-gl.css">

Si no la importaba el mapa funcionaba, pero los marcadores aparecían en sitios extraños y se movían al hacer zoom.

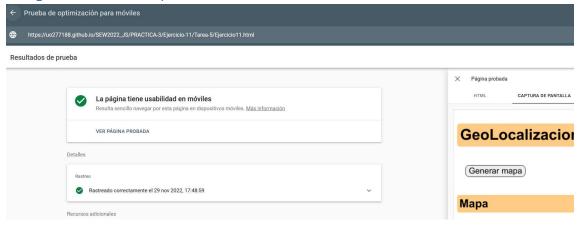

URI: <a href="https://uo277188.github.io/SEW2022\_JS/PRACTICA-3/Ejercicio-11/Tarea-5/Ejercicio11.css">https://uo277188.github.io/SEW2022\_JS/PRACTICA-3/Ejercicio-11/Tarea-5/Ejercicio11.css</a>
 Hay un color de fondo establecido y no hay color de primer plano
 Hay un color de fondo establecido y no hay color de primer plano

Con respecto a mi hoja de estilos aparecen estas advertencias porque no se indica explícitamente el color de primer plano en los elementos donde se indica el color de fondo. Sucede en todos los encabezados.

Sin embargo, tal y como está comentado en el propio fichero css, esta propiedad se está heredando del primer elemento que los contiene en el que sí está especificada dicha propiedad. En mi caso se trata del elemento *body*. Desde el inspector de elementos del navegador se puede comprobar que la herencia es correcta:

# Herramientas de adaptabilidad

## Google Mobile-friendly

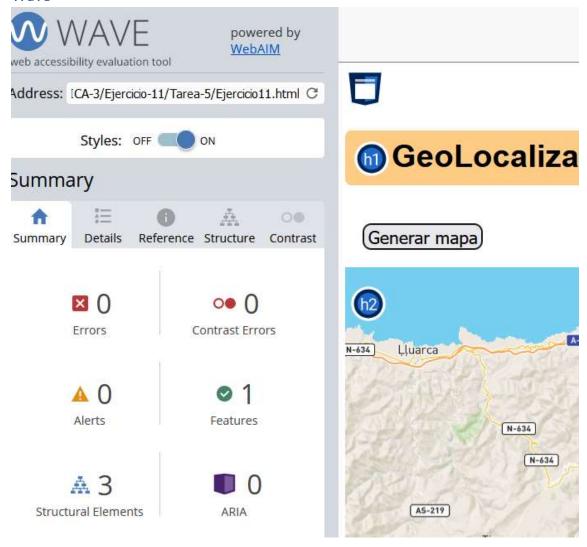

## Screenfly

# Herramientas de accesibilidad

#### Wave

#### **AChecker**
